EDUCATION

Indian Institute of Technology (IIT) BHU, Varanasi **2021 - 2025**
BTech, Civil Engineering CGPA : 7.60

Bholaram Maskara Inter College, Gorakhpur UP **2019 - 2020**
Higher Secondary Certificate (XII), UP Board Percentage: 79.2

Murari Inter College, Gorakhpur UP **2017 - 2018**
Secondary Certificate (X), UP Board Percentage: 82.5

INTERNSHIP

Data Science Internship at Global Techify Pvt. Ltd **May–Jul 2023**

- Built predictive models using python, scikit-learn, and TensorFlow for Recommendation systems.
- Implemented data preprocessing, data visualization, feature engineering, and model evaluation pipelines.
- Deployed the model as a REST API on AWS Lambda for real-time predictions.
- Collaborated with cross-functional teams to deliver data-driven solutions.

Exposure: Exploratory Data Analysis (EDA), Market Research, Data Visualization, AWS, PowerPoint.

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, SQL (MySQL, BigQuery), C/C++
- **Libraries/Frameworks:** Scikit-learn, Keras, Pandas, NumPy, Seaborn, TensorFlow, Matplotlib
- **Tools & Technologies:** VS Code, Excel, Tableau, PowerPoint, GitHub, Google Colab, Jupyter Notebook
- **Domain Expertise:** Data Analytics, Data Science, Statistics, Machine Learning, Deep Learning, NLP

PROJECTS

Rainfall Runoff Modelling using ANN **Jan–Jul 2024**
UG Project , Supervisor - Prof. Pramod Soni

- Analyzed and transformed 15K+ data points from IMD (Indian Meteorological Department) and NSRDB (National Solar Radiation Database) for Krishna basin Maharashtra, into structured tabular datasets, organizing parameters such as temperature, precipitation, humidity, solar radiation, and wind speed by date, latitude, and longitude.
- Developed and optimized an ANN model for rainfall-runoff prediction, improving the R^2 score from 0.49 to 0.61 through hyperparameter tuning, enhancing the accuracy of hydrological forecasts.
- Proved the model's effectiveness in predicting streamflow and runoff across multiple scales, making it a valuable tool for water resource management, flood forecasting, and climate impact assessment.

Dark Store Inventory Analytics & Sales Estimation **Jul 2025**

- Built an SQL pipeline for Blinkit, transforming 622K+ inventory records into 14K+ insights with 99.8% coverage.
- Engineered sales estimator using LEAD and averages, covering 99.8% of 1.4K+ SKU-store pairs.
- Delivered 12 KPIs including out-of-stock (42 to 89 % range) and discount leakage (7.2 % average) for 15+ cities.
- Optimized data pipeline using APPROX_TOP_COUNT to resolve 150+ SKU price duplicates, enabling real-time inventory decisions.

Sentiment Analysis of Skincare Product Reviews **May 2025**

- Built LSTM sentiment classifier with TensorFlow, achieving 85% test accuracy for review analysis.
- Created text preprocessing pipeline (lowercasing, punctuation removal, lemmatization, stop words filtering) for NLP.
- Tokenized & padded texts (10K vocab, 200-seq length) for optimized LSTM input.
- Extracted features using BOW, TF-IDF, and Word Embeddings to vectorize skincare review data.
- Revealed sentiment trends and user concerns to guide product improvements and targeted marketing.

CERTIFICATIONS & ACHIEVEMENTS

- Solved 600+ DSA problems on GeekforGeeks and LeetCode.
- Solved 150+ SQL Problems on LeetCode, InterviewBit, StrataScratch and HackerRank.
- Hacker Rank-certified in SQL (Medium and Advanced levels).
